

Define CS, fit into CC	<div>1. CUSTOMER SEGMENT(S)<div>CS</div><p>In our project the customer segments are Owners of used cars, Buyers of used cars.</p></div>	<div>6. CUSTOMER CONSTRAINTS<div>CC</div><p>The credibility of the documents provided by the seller, Apart from this , other factors also which influence the resale value of the car.</p></div>	<div>5. AVAILABLE SOLUTIONS<div>AS</div><p>To check the original documents of firsthand owner of the car.</p><p>How many times the car had serviced in the company showroom.</p></div>	Explore AS, differentia
	<div>2. JOBS-TO-BE-DONE / PROBLEMS<div>CC</div><p>This project shows the car efficiency for the buyers/A buyer can be prevented from fraudulent practices and a person who wishes to sell their car can know the full value of their vehicle.</p></div>	<div>9. PROBLEM ROOT CAUSE<div>RC</div><p>The sellers could forge the documents, and do malicious attempts to lie about the original market value of the car and cheat the buyer. The buyer will come to know that he/she has been cheated only after sometime duration from the purchase.</p></div>	<div>7. BEHAVIOUR<div>BE</div><p>i.e. directly related: find the right solar panel installer, calculate</p><p><b>Directly Related :</b> Find user friendly resale value prediction application or websites.</p><p><b>Indirectly Related:</b> Permission to access project database.</p></div>	
Focus on J&P, tap into BE, understand RC				Focus on J&P, tap into BE, understand RC

<div>3. TRIGGERS Accurate resale value of the cars based on minimal features. <div>TR</div></div>	<div>10. YOUR SOLUTION The solution is by creating a prediction model which accepts input from the user over the various specifications and concerns of the buyer and provides the most accurate <div>SL</div></div>	<div>8. CHANNELS of BEHAVIOUR <b>ONLINE:</b> Inputs the car details and extract the details for prediction. <b>OFFLINE:</b> Stores the predicted data in the internal state <div>CH</div></div>
